

SQUARE. ORANGE. SMART.

SF 22

SF 28

SF 32

Our patented code approved square design is not only fast & easy, Square Foot™ also creates a structurally stronger footing by increasing stability, increasing capacity, resisting uplift, accomodating rebar, allowing a continuous concrete pour. The Square Foot™ product line lifts any 8" through 18" construction tube with its unique wedge system.

TUBEBASE®; ICBO CODE APPROVED, IS NOW CALLED SQUARE FOOT™  

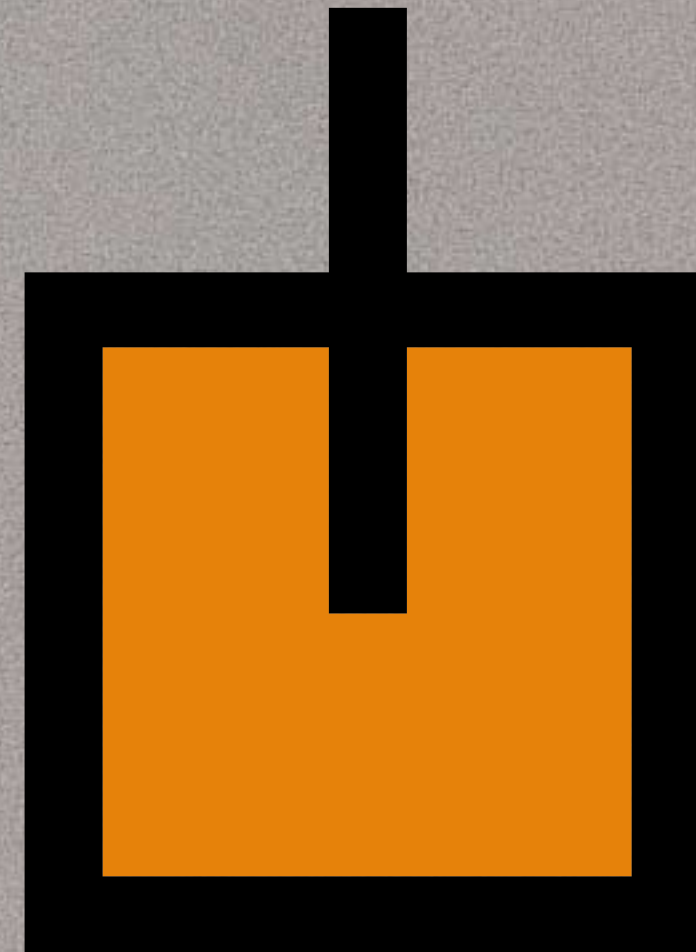

SQUARE FOOT™

SQUARE FOOT™

IT'S EASY AS...

1. Cut off excess plastic at wedges to construction tube size and saw construction tube to desired length.

2. Attach construction tube to Square Foot™ with a minimum of four, 1" (2.5cm) screws.

3. Place Square Foot™ in excavated hole and backfill. Ensure tube remains level/plumbed.

BY CONTRACTORS. FOR CONTRACTORS.

Square Foot™ footing forms were invented and engineered by Don Wells and Scott Ireland. As the owners of one of Vermont's largest General Contractors – DEW Construction, and SD Ireland – one of the states largest Sitework and Concrete Contractors, they knew footings were important. But there had to be an easier way. Now, with Square Foot™, you can benefit from both **INCREASED EFFICIENCY** and a **SUPERIOR FINISHED PRODUCT**.

PUT THE HAMMER DOWN

Square Foot™ is the **FASTEST** and **EASIEST** way to form concrete footings. Gone are the days of building wooden footing forms by hand. With Square Foot's™ patented, square plastic footing form you'll dramatically **DECREASE CYCLE TIME, LABOR** and **MATERIAL COSTS** and benefit from a superior finished footing. Use Square Foot™ on or above-grade and turn the excavation, backfill and pouring of concrete into one easy step!

SQUARE FOOT™

BE SMART. BE SQUARE.

OUR PATENTED SQUARE DESIGN:

- Increases stability and bearing capacity
- Resists uplift
- Facilitates rebar with tie holes on each corner
- Levels easier
- Stacks for easy storage

SMART CONTRACTORS USE SQUARE FOOT™:

- Unique Wedge System fits any size construction tube
- Significant savings of cycle time, labor and materials costs
- Excavate, backfill and pour concrete in one easy step
- Residential, commercial or industrial use
- Gusset System provides structural integrity
- Air vent holes allow even flow

DO IT RIGHT

Today, with construction quality coming under more scrutiny than ever, building codes are being re-addressed in nearly every state. More and more states are beginning to require the use of footings by code. Square Foot™ makes code compliance **QUICK, EASY** and **COST-EFFECTIVE**.
